

***Attic Breeze***

America's Leader in Solar Powered Ventilation

# BUILT FOR PROFESSIONAL DISTRIBUTION

# ACTIVE VENTILATION SINCE 2006

# Ventilation Is a System. **Not an Accessory.**

Most homes rely on passive ventilation that depends on wind and weather. Attic Breeze introduces active, solar-powered airflow that works when heat is highest — protecting the attic, roof system, and home below.

## **Why Attic Breeze?**

- ✓ *Heat and moisture removal*
- ✓ *Extended roof life*
- ✓ *Reduced HVAC strain*
- ✓ *Zero operating cost*

## ForgeBuilt™

**STRENGTH YOU CAN TRUST.**

ALL-METAL HOUSING FOR SUPERIOR DURABILITY

## PRODUCT DESCRIPTION

UltraBreeze™ is Attic Breeze's premium ventilation platform built for maximum airflow and durability. Powered by UltraFlō™ Technology, it combines a venturi-shaped airflow design with a powerful yet silent motor and a large fan blade to maximize ventilation performance. Designed for large attic spaces, steep pitches, and demanding climates, UltraBreeze™ combines elevated housing geometry with high-output solar power for maximum CFM performance.

## WHY ULTRABREEZE™

- 14" Precision-balanced 5-blade aluminum fan
- Excels on steep pitches and complex rooflines
- Available attached or detached solar panel
- Adjustable solar panel for adaptable sun capture

MAXIMUM  
AIRFLOW.  
BUILT TO  
ENDURE.

# NEW!

## PRODUCT DESCRIPTION

AeroBreeze™ is Attic Breeze's compact 26" solar roof ventilation platform. Designed for efficient attic airflow in standard residential applications, AeroBreeze™ combines durable all-metal construction with high-output solar performance. Its streamlined housing profile delivers reliable cooling while maximizing pallet efficiency for distributors and contractors.

## WHY AEROBREEZE™

Spun aluminum housing with durable powder-coat finish

Sleek, low-profile design that satisfies HOA requirements

Proven performance in coastal and humid conditions

12" Precision-balanced 5-blade aluminum fan

# GABLEBREEZE™

DIRECT GABLE MOUNT APPLICATION

## POWER

## PRODUCT DESCRIPTION

GableBreeze™ is Attic Breeze's high-output gable-mounted solar ventilation solution. Built with all-metal construction and engineered airflow performance, it delivers powerful attic air exchange without roof penetration. Designed for retrofit applications, GableBreeze™ provides efficient cooling through existing gable openings.

## WHY GABLEBREEZE™

- Designed to integrate with existing vent openings
- Active solar ventilation without roof penetration
- Simplified approach to add powered active airflow
- 14" Precision-balanced 5-blade aluminum fan
- Preserves rooflines while adding consistent airflow
- Standard mill finish steel construction
